

## EUROPEAN DAY OF LANGUAGES

September 26<sup>th</sup>- EURO Classes- 2ndes 4 -5

For the European Day of Languages, the 2GT4 class participated in different activities... The first activity was to learn the countries of Europe and their languages in English. This activity was very interesting and enriching because it allowed the class to review the countries and languages of Europe. Some countries' and languages' names are very similar to French, and others are completely different. The second was a group activity which consisted in writing a poem to celebrate European places and languages. In the poem there had to be six countries (their name, their capital city or the adjective). And the poem had to include different rhymes to make this more stylish and elaborate. The poem was quite complicated to write because it was necessary to find nice rhymes which were at the same time related to the country we were speaking about. In a second place, each poem has been read in front of the class to practise pronouncing correctly. The last step for this poem was to work on the layout of our creations. (Each poem was very beautiful and the class was very happy !) And the last activity of this European Day of Languages was a dictation dealing with biodiversity. For the class, the dictation was really hard because the woman spoke fast but that was challenging ! This European Day of Languages was great! **Noémie CURE- 2<sup>nd</sup>4**

The 2<sup>nd</sup>5 students have carried out great work related to the importance of the European union. Each of us created a poster: we had to explain to the class what it represented and what this union meant for us.

A Challenges book to achieve activities in English throughout the year was given to us.

But that's not all! In order to practice Writing, we did a dictation about the protection of biodiversity and we had a lot of fun with several quizzes about Europe!

**Mathilde BRUCKERT- 2<sup>nd</sup>5**
